

IIT INDORE presents

INDUSTRY - ACADEMIA CONCLAVE

21st-22nd January, 2012

About the Conclave

Rapid advances in technology are changing today's workspace, increasing the demand for highly skilled workers who have the knowledge to make the best use of the swiftly evolving technology. Students churned out of the static and stagnant academic system are not equipped to meet the current industry requirements and often companies have to incur additional expenses (time and monetary) to train new hires. As industries look to colleges to fill job openings, institutions are feeling the pressure to update their academic system to be in tune with the industries. Also, industry-academia collaboration, the world over, is extremely limited and hasn't been harnessed to its full capacity. Hence, an urgent need to take proactive steps has been strongly felt to enhance the employability of engineering graduate workforce and make them industry ready.

The Industry-Academia Conclave is a unique platform that will bring together experts from the industry to discuss the most critical issues about the gap in industry and academia today and try to bridge this divide. The Conclave aims at encouraging the exchange of productive ideas and perspectives, thereby, creating a strong linkage with the industries. The Conclave features a confluence of company representatives, academia and students to evolve innovative solutions to vital issues looming in the realm of industry and academia alike.

Theme

As students gear up for their first jobs, one of the biggest challenges every student encounters is the transition from college to corporate life. Suddenly, there is a transformation from assignments and mid-semester to articulation, team work and deadlines. Aggravating the situation is the technology aspect. Students have to adapt to rapidly evolving technology along with a focus on practical and real-life industry problems which may not be inculcated merely by a theoretically sound education. Through panel discussions, this Conclave will endeavor to throw light on some of the indispensable skills necessary to thrive in a corporate ambience and find actionable solutions to line up corporate expectations with technical education.

Whether the current academic system provides the students with the required skill sets and what modifications can be made to improve it.

Takeaways

Highlights

* Panel Discussion

Each company representative will be delivering an overview of the company wherein they introduce their organization, the company's core research and development areas relevant to undergraduate students, and what their company expects from students. This will be succeeded by a panel discussion in which critical issues will be deliberated upon.

* Campus Tour

The representatives will be escorted around the developing campus of IIT Indore.

Day One is dedicated for Computer Science & Engineering and Electrical Engineering Disciplines and Day Two is for Mechanical Engineering Discipline.

- ◇ The Conclave would provide a suitable forum for companies to present their views on an upcoming topic which can transform the Indian educational scenario.
- ◇ Representatives from topnotch companies in their respective domains would be able to confer directly with IIT faculty as well as other company representatives, thereby facilitating an exchange of perspectives.
- ◇ Interactive sessions between company representatives and IIT faculty will help strengthen industry-institution bonds and engender symbiotic partnerships.
- ◇ Students would be able to gauge industry requirements and determine the skill set that companies seek which in turn would assist companies in fostering prospective employees.
- ◇ The Conclave would serve as an ideal platform for an effective and refined schema to emerge and find its place in other academic institutions all over India.

How to Register

Register yourself online at <http://placement.iiti.ac.in/iac/register>
Feel free to contact us at iac@iiti.ac.in for any assistance/enquiries

We look forward to hearing from you, and guarantee that you'll be hearing more about IIT Indore and it's success!
